INTERNATIONAL JOURNAL OF PLASTICITY

Volume 12, Number 1 1996

CONTENTS

E. P. Busso **F. A. McClintock**	1	A dislocation mechanics-based crystallographic model of a B2-type intermetallic alloy
R. C. Batra **C. Adulla** **T. W. Wright**	29	A comparison of 1-D and 3-D simulations of the twisting of a thermoviscoplastic tube
I. Kovács **G. Vörös**	35	On the mathematical description of the tensile stress–strain curves of polycrystalline face centered cubic metals
K. C. Yee **M. E. Mear**	45	Effect of void shape on the macroscopic response of non-linear porous solids
G. Z. Voyiadjis **G. Thiagarajan**	69	A cyclic anisotropic-plasticity model for metal matrix composites
K. Chung **S. Y. Lee** **F. Barlat** **Y. T. Keum** **J. M. Park**	93	Finite element simulation of sheet forming based on a planar anisotropic strain-rate potential
E. Corona **T. Hassan** **S. Kyriakides**	117	On the performance of kinematic hardening rules in predicting a class of biaxial ratcheting histories

Volume 12, Number 2 1996

CONTENTS

A. S. Khan
P. Cheng
147 An anisotropic elastic–plastic constitutive model for single and polycrystalline metals. I —Theoretical developments

P. A. Fotiu
S. Nemat-Nasser
163 Overall properties of elastic–viscoplastic periodic composites

T. Kurtyka
M. Życzkowski
191 Evolution equations for distortional plastic hardening

G. Borino
C. Polizzotto
215 Dynamic shakedown of structures with variable appended masses and subjected to repeated excitations

A. Acharya
T. G. Shawki
229 The Clausius-Duhem inequality and the structure of rate-independent plasticity

C. F. Lee
239 A simple endochronic transient creep model of metals with applications to variable temperature creep

M. Kobayashi
N. Ohno
255 Thermal ratchetting of a cylinder subjected to a moving temperature front: Effects of kinematic hardening rules on the analysis

Volume 12, Number 3 1996

CONTENTS

R. Ami Saada
G. Bonnet
D. Bouvard
273 Thermomechanical behavior of casting sands: experiments and elastoplastic modeling

A. Bouchou
P. Delobelle
295 Behavior and modeling of a 17-12 SPH stainless steel under cyclic, uni and bidirectional, anisothermal loadings. Part I: behavior

P. Delobelle
A. Bouchou 311 Behavior and modeling of a 17-12 SPH stainless steel under cyclic, uni and bidirectional, anisothermal loadings. Part II: modeling

N. Zouhal
A. Molinari
L. S. Tóth 343 Elastic–plastic effects during cyclic loading as predicted by the Taylor–Lin model of polycrystal elasto-viscoplasticity

R. W. Neu
D. Coker
T. Nicholas 361 Cyclic behavior of unidirectional and cross-ply titanium matrix composites

Y. Jiang
P. Kurath 387 Characteristics of the Armstrong–Frederick type plasticity models

Y. S. Suh
F. I. Saunders
R. H. Wagoner 417 Anisotropic yield functions with plastic-strain-induced anistropy

---

Volume 12, Number 4 1996

CONTENTS

G. Hu 439 A method of plasticity for general aligned spheroidal void or fiber-reinforced composites

R. Mahnken
E. Stein 451 Parameter identification for viscoplastic models based on analytical derivatives of a least-squares functional and stability investigations

L. Briottet
H. Klöcker
F. Montheillet 481 Damage in a viscoplastic material. Part I: cavity growth

S. M. Arnold
M.-J. Pindera
T. E. Wilt 507 Influence of fiber architecture on the inelastic response of metal matrix composites

A. Capsoni
L. Corradi 547 Variational formulations for the plane strain elastic–plastic problem for materials governed by the von Mises criterion

F. Montheillet
P. Gilormini 561 Predicting the mechanical behavior of two-phase materials with cellular automata

Volume 12, Number 5 1996

CONTENTS

M. Darrieulat
D. Piot 575 A method of generating analytical yield surfaces of crystalline materials

K. C. Le
H. Stumpf 611 A model of elastoplastic bodies with continuously distributed dislocations

E. B. Marin
D. L. McDowell 629 Associative versus non-associative porous viscoplasticity based on internal state variable concepts

M. Kuroda 671 Roles of plastic spin in shear banding

Gang Lin
K. S. Havner 695 A comparative study of hardening theories in torsion using the Taylor polycrystal model

Volume 12, Number 6 1996

CONTENTS

E. Krempl
J. M. Gleason 719 Isotropic viscoplasticity theory based on overstress (VBO). The influence of the direction of the dynamic recovery term in the growth law of the equilibrium stress

A. S. Khan
P. Cheng 737 Study of three elastic–plastic constitutive models by non-proportional finite deformations of OFHC copper

M. O. Faruque
M. Zaman
M. I. Hossain 761 Creep constitutive modeling of an aluminum alloy under multiaxial and cyclic loading

Y. H. Zhao
G. J. Weng 781 Plasticity of a two-phase composite with partially debonded inclusions

J. G. Boyd
D. C. Lagoudas 805 A thermodynamical constitutive model for shape memory materials. Part I. The monolithic shape memory alloy

i Keywords

Volume 12, Number 7 1996

CONTENTS

J. G. Boyd
D. C. Lagoudas 843 A thermodynamical constitutive model for shape memory materials. Part II. The SMA composite material

M. P. Miller
D. L. McDowell 875 Modeling large strain multiaxial effects in FCC polycrystals

H. W. Cho
Y. F. Dafalias 903 Distortional and orientational hardening at large viscoplastic deformations

T. W. Wright
H. Ockendon 927 A scaling law for the effect of inertia on the formation of adiabatic shear bands

H. Takahashi
H. Motohashi
S. Tsuchida 935 Development of plastic anisotropy in rolled aluminium sheets

M. B. Rubin 951 On the treatment of elastic deformation in finite elastic–viscoplastic theory

i Keywords

Volume 12, Number 8 1996

CONTENTS

A. Abdul-Latif 967 Constitutive equations for cyclic plasticity of Waspaloy

W.-C. Yeh
C.-D. Ho
W.-F. Pan 987 An endochronic theory accounting for deformation induced anistropy of metals under biaxial load

J. Eftis
J. A. Nemes 1005 On the propagation of elastic–viscoplastic waves in damage-softened polycrystalline materials

G. B. Sarma
P. R. Dawson 1023 Texture predictions using a polycrystal plasticity model incorporating neighbor interactions

P. D. Chinh 1055 Dynamic shakedown and a reduced kinematic theorem

D. E. Panayotounakos 1069 *Ad hoc* exact solutions for the stress and velocity fields in rigid, perfectly plastic materials under plane-strain conditions

i Keywords

Volume 12, Number 9 1996

CONTENTS

K. Saanouni
A. Abdul-Latif 1111 Micromechanical modeling of low cycle fatigue under complex loadings—Part I: Theoretical formulation

A. Abdul-Latif
K. Saanouni 1123 Micromechanical modeling of low cycle fatigue under complex loadings—Part II: Applications

K. Wegener
M. Schlegel 1151 Suitability of yield functions for the approximation of subsequent yield surfaces

Y. K. Lee
J. Ghosh 1179 The significance of J_3 to the prediction of shear bands

P. D. Wu
K. W. Neale
E. Van der Giessen 1199 Simulation of the behaviour of FCC polycrystals during reversed torsion

i Keywords

Volume 12, Number 10 1996

CONTENTS

J. Ning
E. C. Aifantis 1221 Anisotropic yield and plastic flow of polycrysrtalline solids

Xi-Qiao Feng
Xin-Sheng Liu 1241 On shakedown of three-dimensional elastoplastic strain-hardening structures

S. Yang
B. Bacroix 1257 Shear banding in strain hardening polycrystals during rolling

Wen F .Pan
Tong H. Lee
Wei C. Yeh 1287 Endochronic analysis for finite elasto-plastic deformation and application to metal tube under torsion and metal rectangular block undert biaxial compression
